

A HIGH-PERFORMANCE INVESTMENT FOR THE FORTUNATE 500.

Only five hundred enthusiasts will be able to acquire what most certainly will be an instant collector's item, the last of an exceptional breed: A limited-edition Buick Regal Grand National offered by ASC Incorporated.

ASC can take any vehicle and make it as special as

BUICK GNX.

this special-edition Buick—in power, performance and appearance. McLaren Engines added a modified turbocharger and inter-cooler to provide a new element of performance to

the already exhilarating 3.8 liter V-6 engine used in the Grand National. And ASC enhanced the GNX with its unique functional styling modifications, special wheels and tires, suspen-

sion and exhaust system modifications, and analog instrument cluster.

For the lucky 500 who get to own one, the GNX is a true limited edition. But it is ASC's expertise, imagination, and production capabilities that made this total performance idea a reality.
